INTRODUCTION

The Department of Advanced Education works with other government departments in an attempt to ensure that there are adequate numbers of appropriately trained persons to provide the health and social services required by the citizens of Alberta. An inter-departmental committee (the Alberta Health and Social Services Disciplines Committee) composed of representatives from the Departments of Advanced Education, Social Services and Community Health, and Hospitals and Medical Care is charged with coordinating efforts in this area. This Committee initiates the collection of information to provide an overview of the supply and demand for health and social services manpower. This information aids post-secondary educational institutions, service agencies and government departments in making decisions pertaining to manpower planning in the health and social service fields.

The purpose of the inventory is to provide information on the output of health and social service training programs in the Province. The data, primarily on the number of enrollees and graduates, can be used in conjunction with information provided by the service sector to identify the demand which may be placed on the advanced education system in the future, and assess the capability of the system to meet that demand. Additional information on manpower supply and demand is available in the Health and Social Services Disciplines Committee Annual Report.

This inventory is not intended to provide descriptions of the various health and social service programs. Calendars that provide detailed program descriptions can be obtained by contacting the registrar's office of the appropriate vocational centre, college, technical institute or university.

The information in this inventory is for the academic years 1980-81 to 1984-85 and will continue to be updated on an annual basis.

Further information on the inventory can be obtained by contacting:

FORMAT OF INVENTORY

The information in this inventory is categorized according to health and social service discipline and is standardized to include the following information:

1. a list of training programs and institutions offering the programs;

2. data on the number of applicants, enrolments and graduates in the academic years 1980-81 to 1984-85; length of programs; intake and graduation dates; and information on quotas; and

3. a comments section which explains the data.

Blanks are used when information is not applicable to a program. The most common example of this is found in programs which do not have part-time students. In these cases the PT columns on the tables will be blank. The tables differentiate between part-time and full-time students wherever possible. Where this is not possible, a comment is added.

The tables are structured, where possible, as follows:

Academic Year	1980-81	1981-82	1982-83	1983-84	1984-85
Quota	20				
	FT PT	FT PT	FT PT	FT PT	FT PT
Applicants	27				
Enrolments					
1st Year	20				
2nd Year		19			
Graduates		18			

If information on the attrition from a particular class is required, it can be obtained by following the enrolments from the first year of a particular program through to graduation. For example, in the above table, the second year enrolment shown in the 1981-82 column represents the same class shown as first year enrolment in the 1980-81 column. The number of graduates from this two year program is shown as graduates in 1981-82. The attrition over this two-year program was two students.

DATA COLLECTION AND DEFINITIONS

To collect the data presented in this inventory, the Health and Social Service Programs Branch of Advanced Education sent data request forms to the head of each program. The format of the request forms were identical to the table format used in the inventory. The program heads were asked to fill in the required information for the most recent academic year and to return the forms. Follow-up telephone calls were made when required.

Terms used in the data request forms were defined as follows:

1. applicants: the number of applications to a program from which enrolment was chosen for a given academic year.

2. enrolment: the number of students accepted by the program in the first intake of a given academic year, plus any additional enrolments resulting from subsequent intakes during that year.

3. graduates: students who completed program requirements and were awarded certificates, diplomas, or degrees.

4. academic year: the period commencing September 1 to August 31 of the following year (e.g. September 1, 1983 to August 31, 1984).

In interpreting the data, it is important to note the following:

1. The quota refers to the optimal capacity of the program and is used as a general guideline for enrolment. Quotas as listed are occasionally exceeded due to anticipated attrition or student transfers between programs.

2. The deadline for accepting applications varies from program to program. While some program heads adhere to a set deadline, others limit the number of applications accepted.

3. Students often apply to more than one program in any given year. For some programs, students will apply to an affiliated health and social service agency rather than to the program directly.

4. Enrolments are classified according to year of study depending upon the level of the majority of courses taken. Enrolment figures may increase between years of study due to students transferring into a program or repeating a year.

5. The comments which follow the enrolment data qualify the information provided and should be reviewed carefully to avoid misinterpretation.

6. Provincial Summaries are provided on green pages to summarize the enrolment data of all programs falling under a similar category heading.

COMMENTS:

1. This was previously recorded as the Criminal Justice Diploma program.
2. Enrolment and graduate data for 1983-84 include students of the Correctional Officer Certificate program.
3. The 1982-83 and 1983-84 quotas apply to the Justice Administration Department as well; hence the increases in the respective quotas.
4. In 1984-85, three part-time students in second year were former graduates of the program who returned for upgrading.
5. The number of graduates may exceed second year students due to the manner in which second year status is calculated and yearly graduate statistics compiled.

COMMENTS:

1. The quota may be exceeded due to students transferring into the program or repeating their first year.
2. The University of Alberta offers a four year program, while the University of Calgary offers a three year program. Hence the low numbers for fourth year enrolments and the apparent disparity between fourth year and graduate figures.
3. See individual programs for a qualification of the data.

Program Length: 2 Years

COMMENTS:

1. This program commenced in 1981-82.

1985-86 Quota[1]:

Enrolments										
First Year		262		186	1	228		243		215
Graduates		10				9		24		26

COMMENTS:

1. The quota for the first course in the program is 100, and 50 for all courses thereafter.
2. The program is offered through Distance Delivery and is geared to part-time students. Those who wish may complete the program within one academic year, though few do. This accounts for the low number of graduates in comparison to enrolments.

NURSING (POST-BASIC CERTIFICATES) (Continued)

TRAINING PROGRAM: Mental Health Nursing[1]

Institution: Mount Royal College

Program Length[2]: 10 months(FTE)/approx. 3 years(part-time)

Intake Dates: September and January

Graduation Dates: April, June and December

1985-86 Quota: 50

ENROLMENT DATA[3]:

Enrolments										
First Year	14		9	14	11	18	39		6	40
Graduates	11		8		7		15		5	

COMMENTS:

1. The focus of the Mental Health Nursing program is distance delivery.
2. Full-time equivalent(FTE) denotes program scheduling to include ten or more course credits.
3. As of 1981-82, all figures have been adjusted to reflect definitions which are consistent with the College Student Record System.
4. A policy of "unlimited enrolment" was adopted in 1983-84 and 1984-85; hence the lack of quotas for those academic years.

NURSING (POST-BASIC CERTIFICATES) (Continued)

TRAINING PROGRAM: Nurse Practitioner Certificate[1]

Institution: University of Alberta

Program Length: 5 Months

Intake Dates: September and February

Graduation Dates: February and July

TRAINING PROGRAM: Occupational Health Nursing Certificate

Institution: Grant MacEwan Community College

Program Length: 1 Year

Graduation Date: April

1985-86 Quota[1]: 15

ENROLMENT DATA[2]:

First Year	25	34	12	39	16	33	13	20	12	31
Graduates[3]	36		20		46		11		12	

COMMENTS:

1. The quota and applicant figures refer to the on-campus program only. The quota has been reduced in 1984-85 due to graduates' recent inability to find employment. The program is to be offered on a trial basis for the next two years.
2. The enrolment and graduate data include an off-campus program offered at Calgary.
3. Graduates include both full-time and part-time students. These may at times exceed enrolment figures, since part-time students enrolled in the off-campus program often require two years to graduate.

Total	689	659	528	526	476	425	461	439	213

COMMENTS:

1. Intake and graduation dates vary for each program; individualized programs encourage students to complete course requirements within six months.
2. Students enrolled in the GMCC program for credentials may pass the CNATS examination before completing coursework and often do not return to finish; hence the low graduation figures for 1984-85.
3. Lethbridge Community College data includes enrolments at the Chinook Educational (Pincher Creek and Crowsnest Pass) Consortium.
4. Olds College data includes enrolments at the Big Country (Drumheller) Consortium.

COMMENTS:

1. Enrolment figures do not include those current students who are expected to graduate outside the reporting year.
2. An accurate number for applicants to the program is difficult to establish since applications are carried over from one intake to another, and students may be referred from manpower offices rather than apply directly to the program.

COMMENTS:

1. The quota figures account for transfer students; however, continuing second year students are not counted when determining the quota.
2. Transfer students who have credit for first year coursework may be admitted into the second year of the program; hence the discrepancy in enrolment from year to year.

Graduates[2]	44	3	51		56		45		42	

COMMENTS:

1. The increase in the number of students from third to fourth year is a result of several students returning each year to upgrade their diploma to a degree.
2. More students may graduate than are registered in fourth year because some students will complete the required physiotherapy courses at the University of Alberta, and then transfer to universities in other cities to complete their optional courses while working. Upon successful completion of these approved electives, the students are awarded a degree from the University of Alberta.
   Graduates include both full-time and part-time students.
